I N C .

OVERVIEW & ZONING CONTEXT:

The project site is located on the northeast corner of West Broadway and Burrard Street within the Granville/ Burrard Slopes Area B and FGGB policy area of the Broadway Plan. Currently the site is zoned as C-3A and contains an existing gas station and car wash. The future Arbutus Station of the Broadway Subway is located three blocks to the west and Granville Station, three blocks to the east. The site is predominantly surrounded by low-rise commercial and office buildings with the exception of the 9-storey office tower “Prospect Centre” at the southeast corner of Broadway and Burrard and the 11-storey Menkis residential rental tower across the lane on W 8th Avenue. Burrard Street is one of 7 major access streets connecting downtown Vancouver to the Broadway Corridor, making the intersection at Broadway a prominent gateway site.

REZONING INTENT:

The proposed development will rezone the existing parcel from C-3A to CD-1 zoning under the City of Vancouver Broadway Plan. The intent of the proposed rezoning is to develop an underutilized site, currently occupied by a gas station, at a prominent intersection by providing housing units along with local commercial retail. It will contribute to the City’s vision of Broadway as a “Great Street”. This development is being proposed in conjunction with the development at 1368-1398 W Broadway located at Hemlock, another major intersection along the Broadway corridor, which will be the home of a much-needed senior’s centre, 257-key hotel and 197-unit residential strata.

APPLICABLE POLICY AND GUIDELINES

- Broadway Plan (2022, last amended 2025)
- Vancouver Plan (2022)
- C-3A District Schedule (2025)
- Family Room: Housing Mix Policy for Rezoning Projects (2016)
- Green Buildings Policy for Rezoning (2010, last amended 2024)
- Community Amenity Contributions Policy for Rezoning (1999, last amended 2024)
- Development Cost Levies Information Bulletin (2018, last amended 2025)
- Vancouver Development Cost Levy By-law No. 9755 (2008, last amended 2024)
- Vancouver Utilities Development Cost Levy By-law No. 12183 (2018, last amended 2024)

CONTEXT & ZONING MAP

REZONING RATIONALE:

The FGGB policy of the Broadway Plan intent is to introduce new opportunities for housing and job space, with active retail/service uses along Broadway. The proposed development features 263 strata residential units with commercial retail on the ground floor. The policy requires continuous active ground floor retail/ service uses along Broadway and Burrard and encourages Privately Owned Public Space (POPS) at the Burrard intersection, both of which the proposed development complies with. The proposed development does not align with existing policies with regard to height, density or minimum frontage, as outlined below. (There are several policy items that this development challenges due to the current difficult financial and construction market.)

Note, as this is a strata housing development, there will be Community Amenity Contributions. In addition, there is no residential tenants on the existing site, therefore no displacement. There are no view cones that impact this site.

PROPOSED RELAXATIONS & VARIANCES:

Building Height- The FGGB policy permits 5.5 FSR, 20-storeys of strata ownership housing. Alternatively, the FGGB policy also permits 10 FSR, 30-storey secured market rental, including 20% below-market rental housing. This suggests that the urban design for this site can support 30 storeys. The proposed development is 33-storeys strata ownership housing. As the site is at a prominent intersection, a 30 to 33-storey development is an appropriate urban design massing, regardless of its use.

Building Density- The FGGB policy allows 5.5 FSR for strata or 10 FSR for Secured market rental with 20% below-market rental. This proposal is 14.6 FSR strata. This project is financially and conceptually linked to the nearby rezoning proposal at 1368-1398 West Broadway and Hemlock which includes a 12,000 sf seniors centre, 257-key hotel and strata residential. The additional density requested on the Burrard site helps with the financial feasibility of the seniors centre on the Hemlock site. At 14.6 FSR, the additional density is comfortably included within the 33-storey building form.

Minimum Frontage- The minimum required site frontage for a tower in the Broadway Plan is 150 ft, however frontage relaxation of less than 150 ft may be considered at the discretion of the Director of Planning. A 7 ft width of the property had previously been dedicated to the widening of Burrard resulting in a smaller than typical site at 143 ft by 115 ft.

Job Space- A minimum of two levels of non-residential uses (job space) is required. This proposal features commercial retail on the ground floor and no office or commercial use on floor 2. Commercial uses above the 1st floor have generally been challenging financially and in attracting tenancy in recent years.

Floor plate size- The Broadway Plan maximum recommended floor plate size is 6,500 sf. The proposed tower ranges from 7,665 sf at the lower levels and slims down as it rises to 7,500 sf, 7,110 sf and 6,730 sf at the penthouse levels. The larger plate size improves the efficiency of the tower, contributing to a more financially feasible project, and is aligned with recent proposed planning department policy changes to increase the maximum tower plate sizes to 8,500 sf.

Balcony area- Private balcony area allowance is typically maxed out at 12% of the net area, however the proposed tower has 18%. The design concept for this tower utilizes the balconies to express the form and lively movement of the massing. The generous liveable balconies provide high quality exterior spaces for the residents. The comfort and useability of balconies on tall buildings are usually more successful if they are larger and recessed/ or contained at the sides, which provides a sense of enclosure, security and privacy as compared to a small protruding balcony.

Public Bike Share- The City has requested the installation of a Public Bike Share at this site. This is a small site at 143 ft by 115 ft. In addition, a corner cut and a 3m dedication along Burrard Street has been provided. A substantial Privately Owned Public Space (POPS) has been provided along both the Broadway and Burrard frontage which contributes significantly to the public realm, befitting of a major intersection and gateway site to the Broadway Corridor. The generous contribution to the public realm makes the inclusion of a Public Bike Share extremely difficult.

DESIGN RATIONALE:

The development consists of a 13.1 FSR 30-storey strata residential tower and 4-storey podium with commercial on the ground floor. A 7 ft slice of the property had previously been dedicated to the widening of Burrard resulting in a smaller than typical site at 115 ft by 143 ft. In addition, a corner cut and a 3m dedication along Burrard Street has been provided for this proposal, per the City’s request.

The ground plane of the proposed building steps back generously along Burrard (approx. 31 ft from the back of the curb) and Broadway (30 ft) providing an enhanced corner setback and Privately Owned Public Space (POPS). The landscaping of the POPS and commercial frontage will be extensive and high quality, contributing substantially to the City’s objective to transform Broadway into a “Great Street”. It will feature, seating, planting, high quality paving with ground lighting. The important intersection with Burrard is emphasized by the massing of the tower which presents a strong vertical presence at the street corner and angles back along Burrard, enhancing the view corridor towards the north, while creating a dynamic building form. The upper massing of the tower shifts towards the east, separated from the lower part of the tower by 2 recessed floors.

The 4-storey podium continues the street wall form along Broadway and features a recessed, over height commercial ground. Access between the ground floor and commercial underground parking is via a dedicated elevator at the southeast corner of the site along Broadway. The residential lobby is located at the northwest corner along Burrard.

Above the podium facing Broadway, the tower angles back from the corner, providing interesting sightlines and visual movement to the form. The sleek surface of the tower skin consists of thermally enhanced window wall which is contrasted by the dynamic horizontal lines of the balcony slab edges.

The 5th floor landscaped courtyard over the podium provides residential outdoor amenity adjacent to indoor amenity spaces. The 2nd floor also has a residential amenity space with access to a landscaped courtyard and children’s play area.

VEHICULAR ACCESS AND SERVICES:

The development includes 7 levels of underground parking, providing a total of 129 residential stalls, 12 visitor stalls, and 3 commercial stalls. Access to off-street parking, garbage and recycling, and utilities for the development is from the rear lane. The residential bicycle parking on the lowest P-7 level is accessed via a dedicated elevator adjacent to the residential lobby off of Burrard Street. The vehicular parking and bicycle storage provisions both comply with the Vancouver Parking By-Law.

SUSTAINABLE DESIGN:

The development will comply with the City’s “Green Buildings Policy for Rezoning.” Sustainable strategies include, but will not be limited to: the use of airsource VRF heating and cooling, heat or energy recovery ventilation, energy efficient appliances and mechanical systems, measures to curb domestic water consumption, control of rainwater runoff, materials and products to improve indoor environmental quality, multi-glazed windows, and strategies to reduce heat loss and air leakage through the building envelope.

Footprint extrusion.
Express a podium streetwall.
Includes setbacks, 3m dedication along Burrard & corner cut dedication.

Push and skew the four faces of the tower. Pull roof corner up.
•Create interesting, dynamic form at the street intersection.
•Open up view angle towards the north along Burrard.

Carve out the massing.
•Slim the massing.
•Provide deeper sidewalk area and quality Privately Owned Public Space (POPS).

Add balconies.
•Generate a visual counterpoint between the skin of the solid massing and the textured, modulation of the balconies.

Amplify the visual movement of the form.
•Twist lower balconies outward to be parallel with the streets.
•Add recessed breaks to the form.

DRAWING NO.:

A3.12

This architectural floor plan shows a building with a total width of 143 FT. and a depth of 115 FT. The plan includes various rooms such as bedrooms (e.g., 601, 602, 603, 604, 605, 606, 607), bathrooms, a kitchen, a dining area, a living area, a mechanical room, and an electrical closet. The plan also shows a central staircase area with 'EXIT' signs and a 'MECH. INTAKE'. The building is surrounded by a 12'-0" setback on the left and a 40'-0" setback on the right. The plan includes dimensions for setbacks and room sizes in both feet and meters.

The image shows a portion of a floor plan for Level 15. It includes a large rectangular area labeled '1502-RD' and a smaller, shaded purple area labeled '1502 2-Bdr'. There are several circular markers, likely representing columns or structural elements, scattered throughout the plan. The plan is partially cut off on the left and bottom edges.
