

# BUILDING PROGRAM

**Office**

The facility's office space will house the ISS of BC as well as a number of other not-for-profit organizations. Uniting the outreach services available to immigrants and refugees in one facility will increase efficiencies and streamline access to care.

**Residential**

The residential aspect of the facility will feature flexible unit configurations. It will be designed to provide first-stage and second-stage housing for both singles and families of up to 16 members.

**Clinic**

An on-site clinic will serve the project's client base.
