

Blocks A&B Parking Plans

Level P1 Plan – Public Parking

Level P2 Plan – Residential Parking

Level P3 Plan – Residential Parking + Self Storage Centre (Upper level)

Blocks C&D Parking Plans

Blocks A&B Parking key points:

- The P1 level under Blocks A&B is reserved for public parking, which serves the retail, office, and community uses on the Arbutus site. Parking stall widths and ceiling heights are generous, in order to facilitate easy and inviting parking for the general public.
- All parking levels have been conceived of as continuous floor plates under both Blocks A&B. Due to the phasing of the Arbutus project, Block A (Phase One) will be constructed with a knock-out panel in place that will later connect to the Block B parking levels constructed during Phase Two.
- Building residents continue down a secured ramp to the P2 and P3 levels, where the private parking for Blocks A&B residents occurs.
- The P3 parking level is shared with a Self Storage Centre.
- The Self Storage Centre is accessed via a dedicated elevator from the P1 public parking level, as well as via dedicated service lifts that originate from each of the internal loading zones on Blocks A&B.
- The Self Storage Centre also occurs on a fourth sub-level under Block A.

Blocks C&D Parking key points:

- The Levels P1 and P2 of Blocks C&D are reserved for private residential parking, serving the residents of Blocks C+D.
